

Please add the following claim:

67. A method for forming a container capacitor comprising:
- fabricating a cup-shaped bottom electrode;
 - providing an insulating layer around an exterior surface of the cup-shaped bottom electrode, such that an entire vertical height of the exterior surface is in contact with the insulating layer;
 - masking a first portion of the insulating layer;
 - etching a second portion of the insulating layer from a first region of the exterior surface to expose the first region of the exterior surface, such that the insulating layer remains in contact with a remaining region of the exterior surface;
 - depositing a dielectric layer on the first region of the exterior surface; and
 - depositing a conductive layer on the dielectric layer.
-
